

Limited to physical contact

Segment and track the **hand-held** objects.

Focus on implicit intent

Locate an object that matches the **intention**.

Require explicit signals

Ground referred object involved in **narration**.

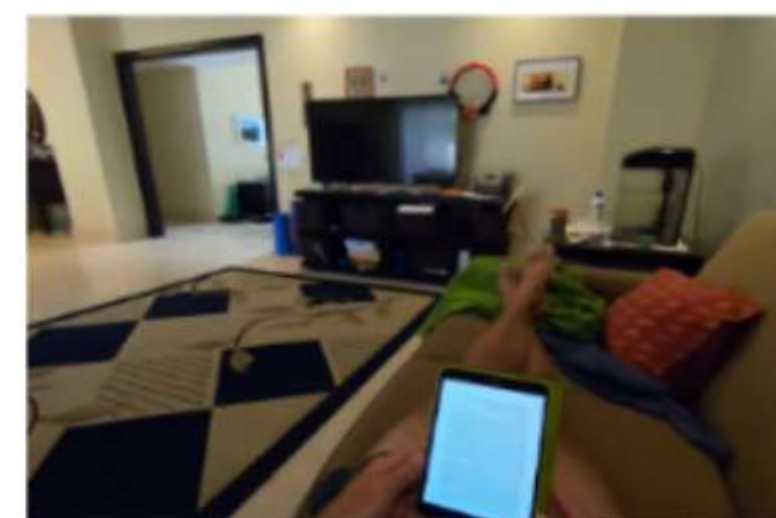

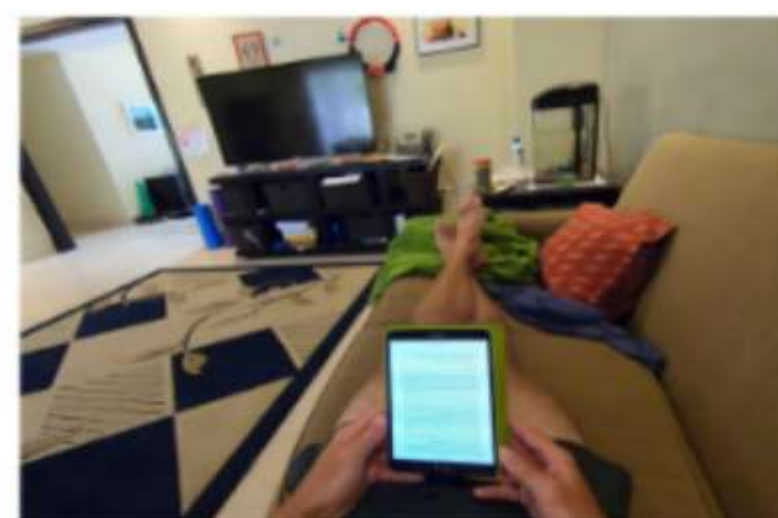

$t - 2$ ----- $t - 1$ ----- t (current)

Naive cue vs. Correct Inference

T1 MINE

Current frame
alone suffices

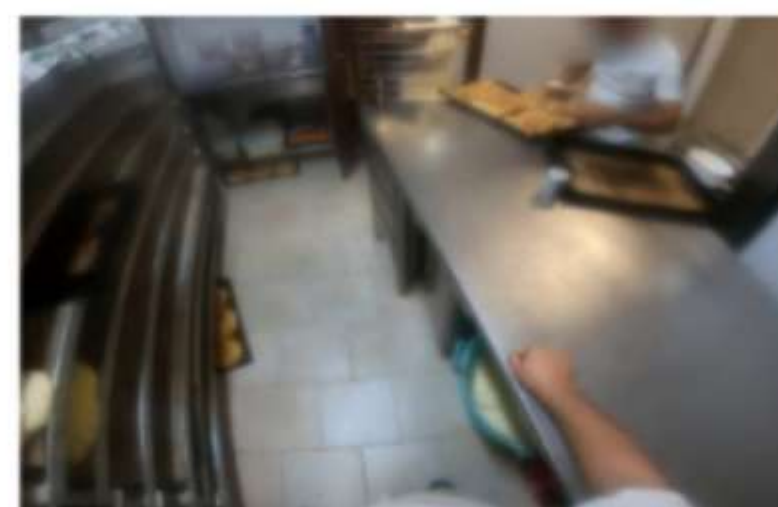

✓ MINE

*Pad held by the camera
wearer in every frame.*

T2 SHARED

Conflicting cues,
single frame

✗ Proximity → MINE
✓ Affordance → SHARED

*Tray in ego zone, but it's
communal bakery tool.*

T3 OTHERS

Should Track a
Past evidence

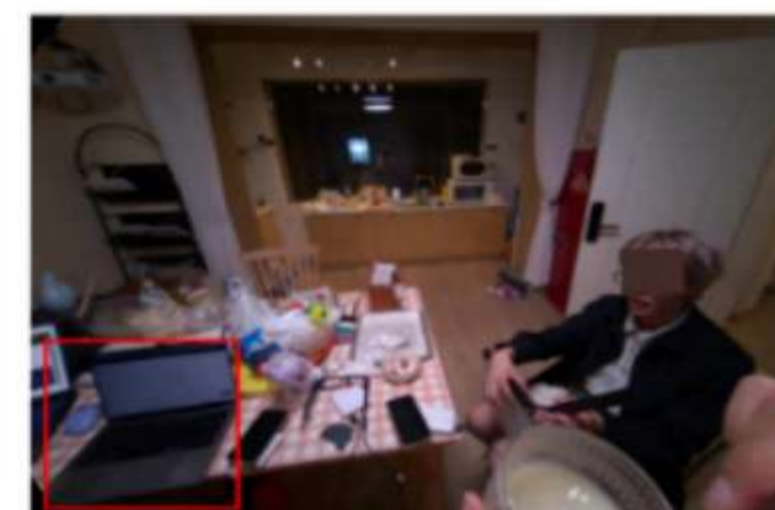

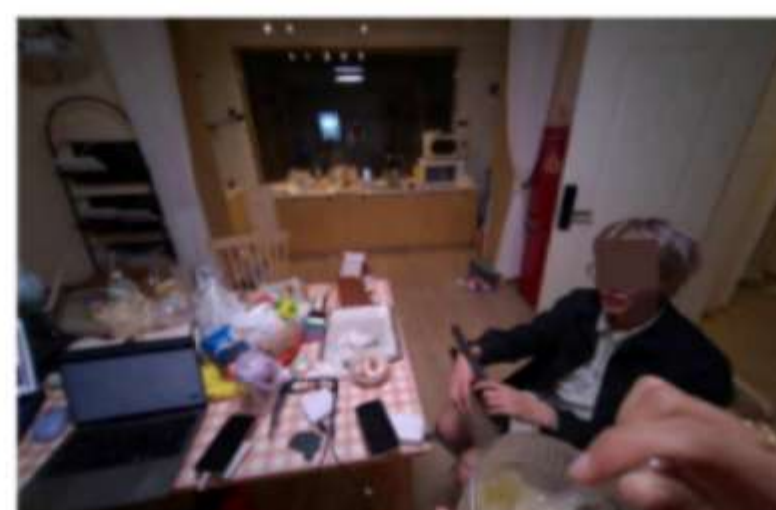

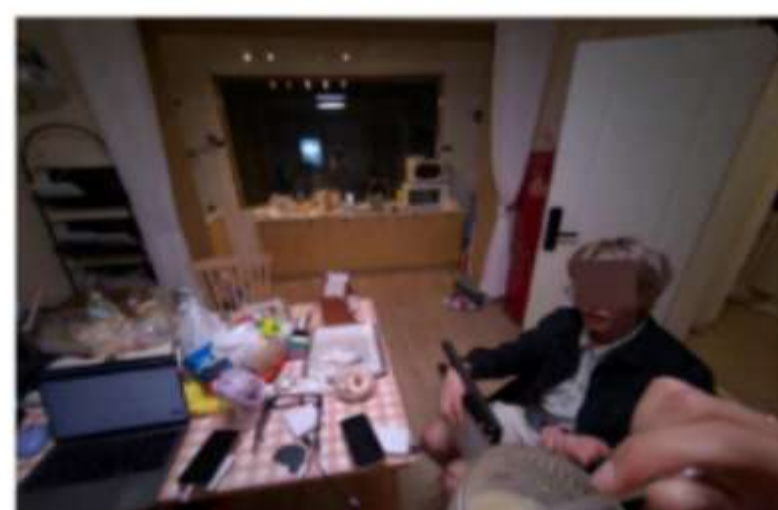

✗ Current Frame → MINE
✓ W/ History → OTHERS

*Need to look at previous
frames to infer correctly*

T4 AMBIGUOUS

Cues do not
ground ownership

✗ Forced guess
→ hallucinate ownership
✓ AMBIGUOUS (abstain)

*Need to withhold judgement
in this case.*
